

VESSEL

AIR NIPPER

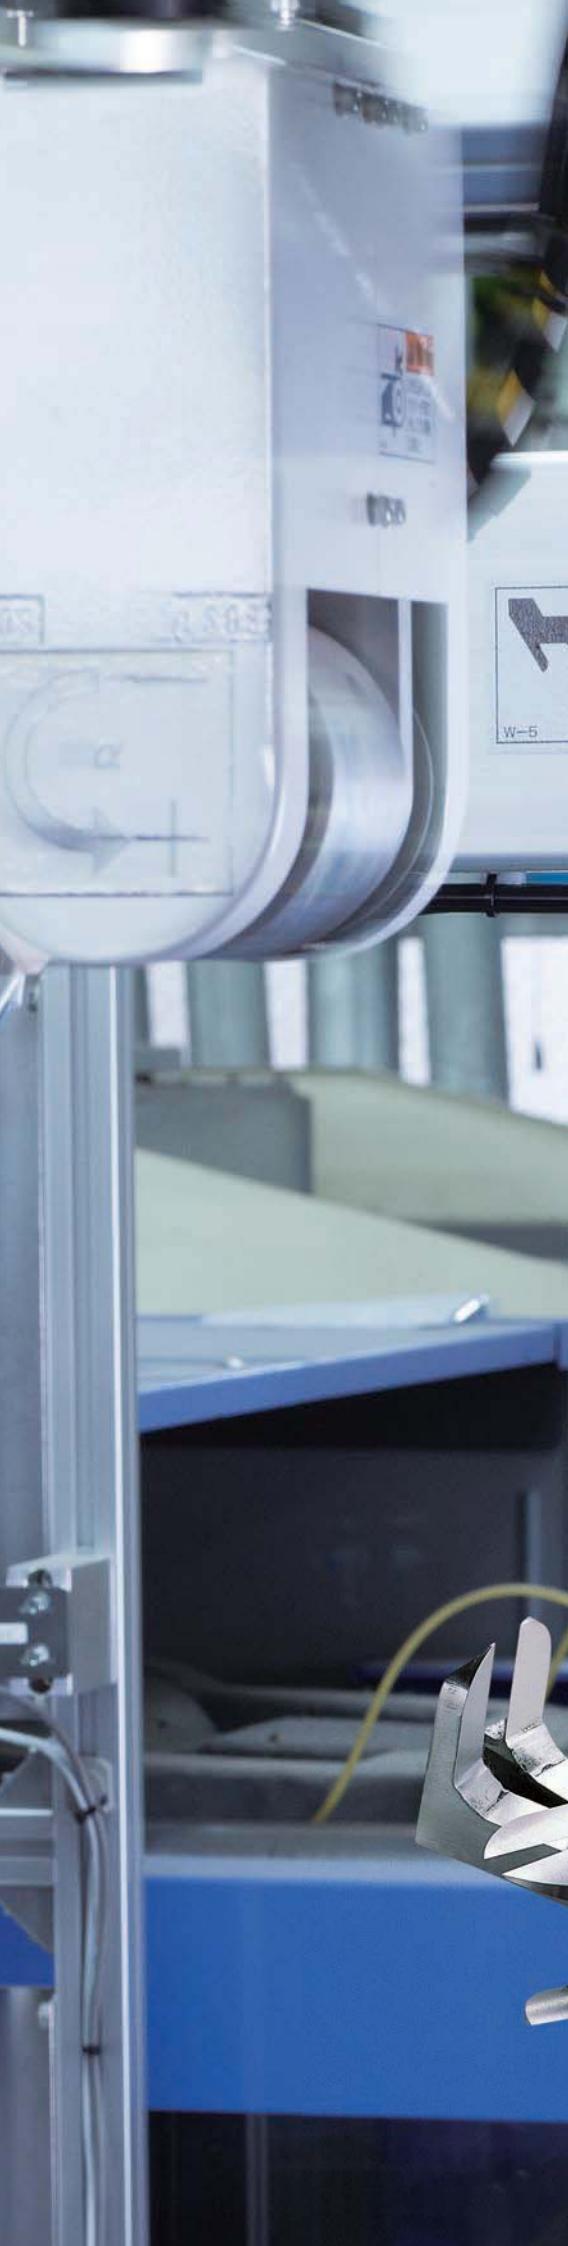

Air Nipper

Can provide you with various solutions of
custom-made blades for your needs.

Air Nipper Application's / Advantages 3 - 6

01

Sliding Air Nippers Horizontal-type 7 - 9

Sliding Air Nippers Horizontal-type blades 10 - 11

Sliding Air Nippers Vertical-type 11

Sliding Air Nippers Vertical-type blades 12 - 13

Thrust-Cut Air Nippers 14

Thrust-Cut Air Nipper blades 14

02

Heat Air Nippers 15 - 18

03

Air Nippers 19 - 22

Air Nipper blades 23 - 26

04

Air Scissors 27

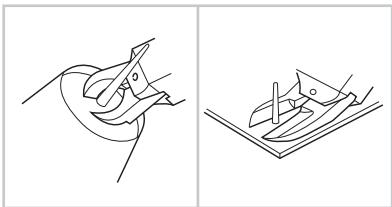

Custom-made Blades 28

Blade Technical Data 29

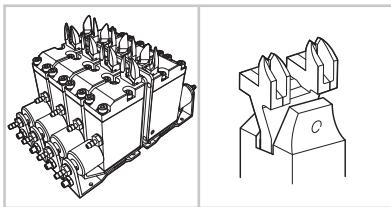

Applications

Cutting direct gate molded components

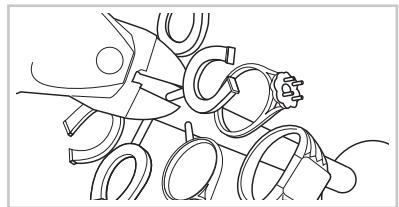

Cuts large diameter sprues such as garment cases, helmets, pipe joint parts, trash cans, planters. Superb durability in long term use.

Gate cut for multiple impression molded components

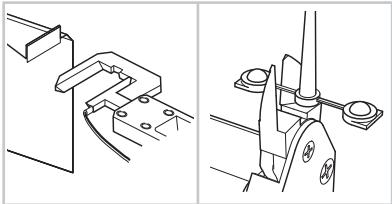

Compact, lightweight body and with a large selection of blade items, easy mounting on chuck board and standby jig. Achieves efficient cuts matching cycle time.

Taking products from a jewelry tree

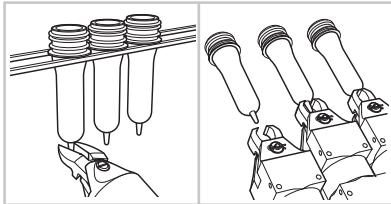

Cutting of precious metals for rings, necklaces etc. Superb durability and increased efficiency with powerful nipper blades.

Gate cutting for lenses, LGP, and transparent products

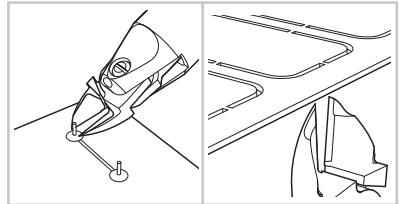

Various heated nippers prevent cracks and whitening, the decisive factor is the heating temperature of the blades and cutting speed. Supports demands for improved flexibility and high precision cutting.

Pre-form cutting for food and drug cases

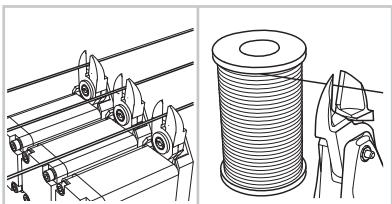

Improved efficiency in pre-forming, nippers attached to flat finish pre-form molding machine. Cut precision is linked to product quality.

Cutting electronic components and around boards

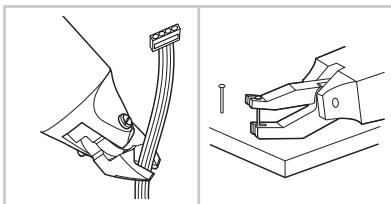

Optimal handy nippers for cutting lead lines after soldering to significantly reduce wrist strain. Substrate is attached to the desktop robot….

Wire cutting with coil winding machine

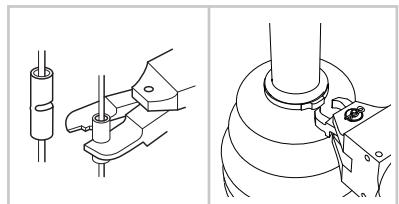

Attach to the nipper unit of automatic coil winding machine for power transformers, fan motors and ignition. Cutting thick diameter wires that cannot be torn off.

Hand tools for dismantling in recycling plants

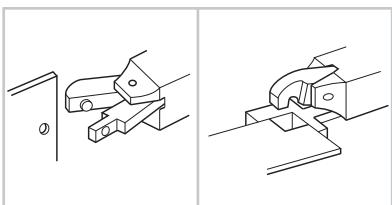

Cuts a variety of wires, copper tubing and steel bands in recycling plants such as PCs and OA equipment, pachinko machines, TVs, and refrigerators, washing machines, etc. Nippers for the purpose of pulling out the pachinko machine pins.

Crimping task for solderless terminals

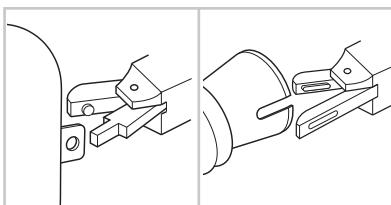

For crimping terminals with various wiring harnesses such as for switchboards, electrical products and lighting equipment. Less strain on fingers and wrists. Increased work efficiency for stop rings for auto parts.

Die cutter for aluminum products and plastic components

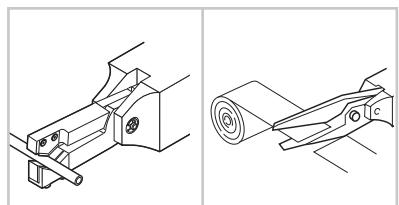

By support for separate blades, allows punching and form cutting of aluminum sash and thin plates.

Punching of blow molded products, punching slotted holes

Punching blow molded products, punching slotted holes, for containers that cannot be punched and automobile ducts, etc.

Other applications

Micro-edge air scissors that can cut various hard-to-cut fibers, carbon, aramid fibers, and soft plastic sheets. Nippers for cutting belt loops of jeans, peeling recycled golf balls, cutting edges with textile machinery, etc.

Selection method for air nipper

VESSEL

Check materials

What is the "cutting target (workpiece)"?

- Metal wire
 - Steel wire
 - Copper wire
 - Piano wire (not heat processed/HV320 or below), precious metals etc.
- Molded plastic
 - Soft plastic (polyvinyl chloride, polyethylene)
 - Hard plastic (acrylic, polycarbonate, ABS, etc.)
- Other applications
 - Check materials, applications and work.
(Bending, caulking, punching, robotic hand, and scissors.)

Check dimensions

How big is the "size of the cut portion"?

- Metal
 - Angle (mm×mm) [select model by cross-section area]
 - Round (Φ mm)
- Plastic
 - Angle (mm×mm) [select model by cross-section area]
- Other applications
 - Check materials, applications and work.

Usage

What is the "state/environment of the work"?

- Used mounted on automated machinery and robots.
- Used for manual work.
- Used mounted on a jig. And so forth

Select model

Choose a model suitable for the purpose.

Choose based on "usage and cut dimensions" for the main unit, and "material and dimensions/shape" for the blades.

Refer to "product specifications" for the main unit/blade characteristics/usage, respectively. Also when selecting the machine, refer to "capability selection chart".

The shape/material of the workpiece may not be compatible with standard products.

Guidance for capability selection

Note : The table below shows capabilities achieved when standard blades are installed.

Types	Cutting material						Applicable models	Air pressure (MPa)
	Copper wire	Steel wire (Non-heat treated)	Piano Wire (HV320 or below)	Soft Plastic	Hard Plastic	Solderless terminals		
N · NS · NR	1.0mm	0.5mm	0.2mm	2.0mm			NS2, N3, NS3, NR3	0.4~0.5
	1.0	0.5	0.3	2.0			N5, NS5, NR5	0.4~0.5
	1.6	1.0	0.5	3.0	2.0mm		N7, NS7, NR7	0.4~0.5
	1.8	1.2	0.5	4.0	2.6		N10, NS10L, NR10L	0.4~0.5
	2.3	1.7	0.6	4.5	4.0		N12	0.4~0.5
	2.6	2.0	1.0	7.0	5.0		N20, NS20, NR20	0.5~0.6
	3.3	2.8	1.2	10.0	6.5	1.25/2.0	N30, NS30, NR30	0.5~0.6
	5.5	4.5	2.0	12.0	6.5		N50, NR50	0.5~0.6
With pressure booster	2.6	1.6		5.0	4.0	1.25/2.0	P-10L	
	3.0	2.2		8.0	6.0	2.0/5.5	P-20

Air Nipper

Tough aluminum body

Standard blades

Blades open and close by a spring repulsion.

NM blades

Special blade without spring for 24-hour operation; blades open and close by a magnet repulsion.

Air nippers

Model

No. **NY10 AJ**

Blade shape

AJ : Straight blades for plastic — **RAJ** : Straight blades for plastic reverse bevel

AJL : Straight long blades for plastic

AJT : Thin, straight blades for plastic

AE : Nipping blades for plastic

AJY : Thin, straight blades for plastic

AD : Lift blades for plastic

AH : Crank blades for plastic — **RAH** : Crank blades for plastic reverse bevel

AJB : Straight blades for plastic, a brazed carbide tip

AVJ : V shaped straight blades for plastic

AJH : Straight blades for plastic, a brazed high-speed steel tip

BJ : Straight thin blades for metal — **RBJ** : Straight thin blades for metal reverse bevel

For more precise gate-cutting:

Heat air nippers

These nippers perform cutting by applying heat to the blade edges. They are good for cutting acrylic lens.

Heat air nippers Thrust-cut type

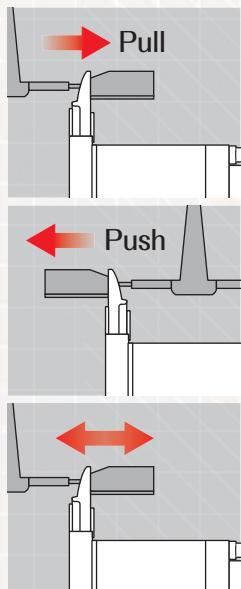

Cutting by the application of heat; thrust-cutting type ensuring a clean, unblemished cut surface constantly.

17P

16P

Slide-off air nippers

The main unit of the nipper slides and the blade comes into intimate contact with a gate, enabling to cut it without resin residue.

Pull/Push

8P

A wide selection of models can support various applications. Possible to fix the highly precise positioning against the gate as there is less rattling or deflection.

Square type

20P

Provided with threaded holes on the 5 faces of the main unit. Suitable for incorporating into a machine or equipment.

Round type

21P

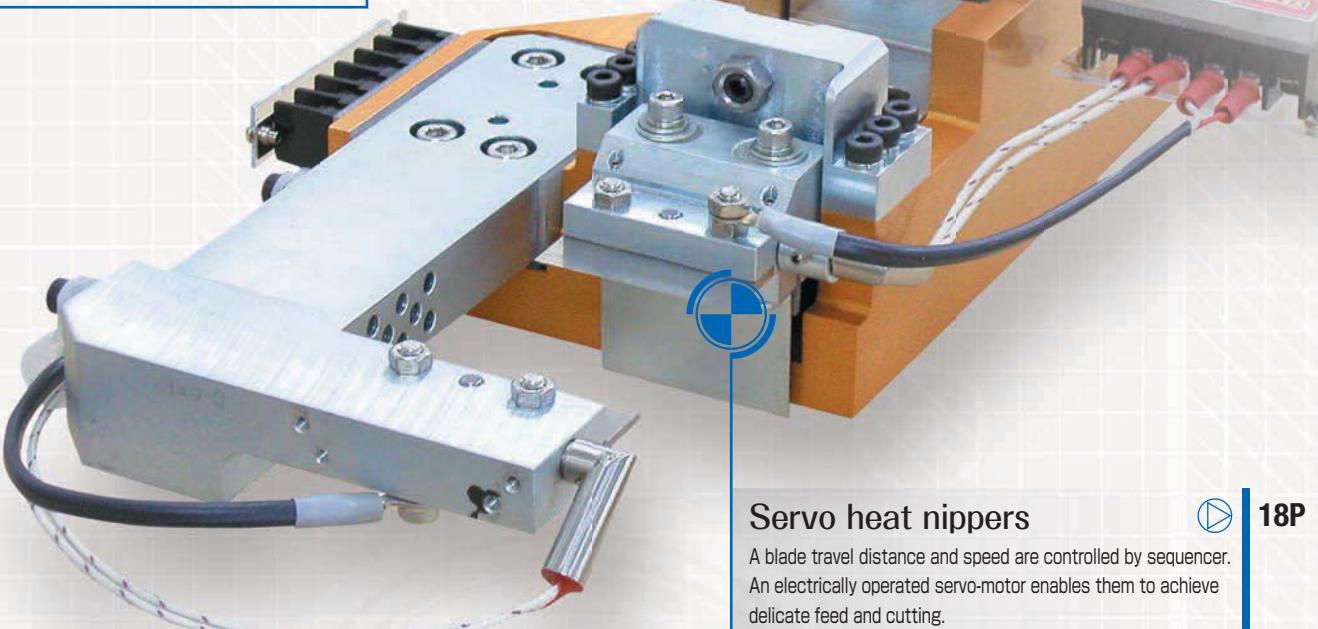

Possible to adjust freely the mounting angle by a stand (option). Suitable for installation on a robotic arm or chuck plate.

Extra Pressure Booster

21P

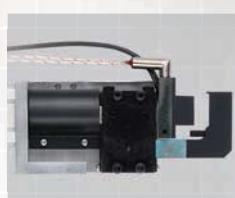

Installing this unit on either square or round air npper enables a pressure to be boosted. Ideal for applications where the radical pressure cannot be attained because of installation space or air pressure.

Servo heat nippers

18P

A blade travel distance and speed are controlled by sequencer. An electrically operated servo-motor enables them to achieve delicate feed and cutting. Wide blades are also suitable for cutting light guide plates.

Differences in the cut surfaces when using heat nippers

Standard Blades
(Not Heat Nipper)

Air-hydro nippers

Thrust-cut type

An air-hydro cylinder of air + oil provides low speeds and high power.

These nippers are suitable for precision cutting in which gate projecting allowance is strict.

16P

Heat Nippers

Air Nippers For Resin Gate

GT-NY10G

These are high-class air nippers that can be mounted on gate cutting equipment and standby jigs for accurate, speedy cutting of resin products. VESSEL has a wide selection of items to meet a variety of needs not only for around-the-clock operations but also for the highly precise cutting accuracy.

V-Groove Slide System PAT.P.

VESSEL's patented, V-groove sliding system reduces malfunction caused by eccentric load, and ensures appropriate positioning.

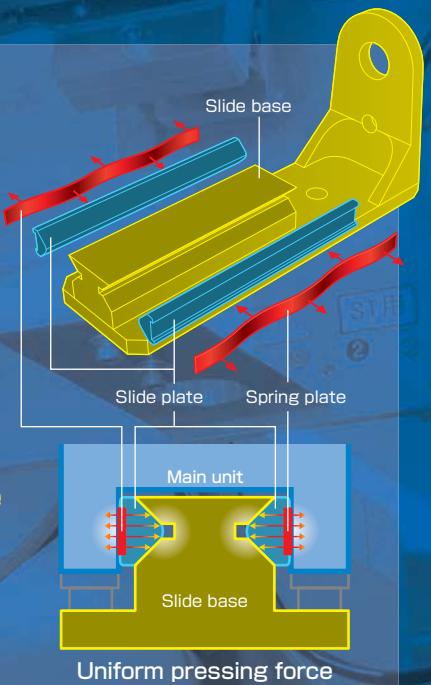

Spring Plate PAT.P.

A spring plate is inserted between the main unit and slide base.

The spring plate has a uniform pressing force, enabling the main unit and slide plate to be always stabilized without rattling.

Machined Slide Base

Superior in rigidity in comparison with the one made by press working. High precision, no deformation, and good durability.

Sliding Air Nippers Horizontal-Type

VESSEL

GT-NY05/10/15/25

Sliding Air Nippers Horizontal-Type

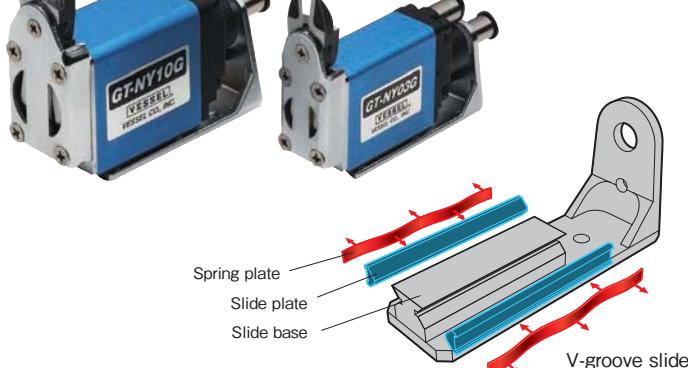

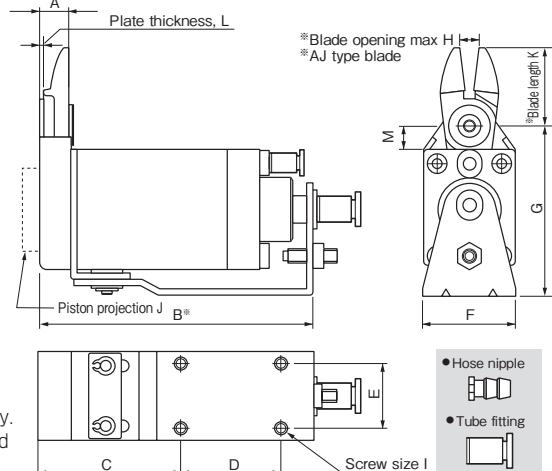

- The horizontal slide enables space to be used effectively.
- The low profile of the main unit allows work to be removed without obstructing the operations of the chuck plate.

Slide-off air nipper Vertical-Type Blades

VESSEL

AJ/AJH/AJB

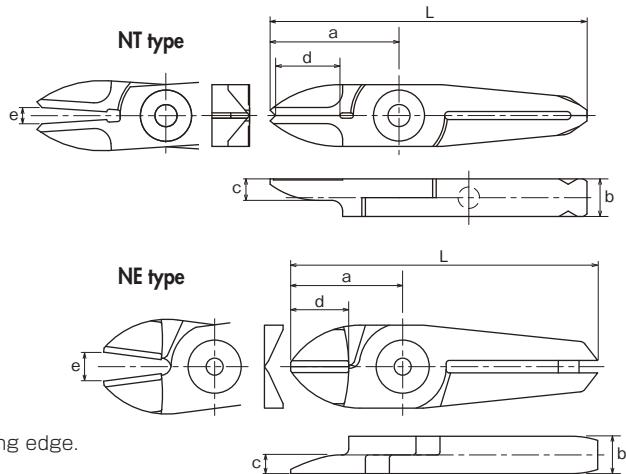

Straight blades for plastic

AJ/This is a set of vertical blades with an unbeveled cutting edge.
You can apply it at a right angle to the gate.

AJH/This has a brazed high-speed steel tip suitable for cutting hard plastic.

AJB/This has a brazed carbide tip used for cutting hard plastic or plastic containing glass fiber. Improved durability.

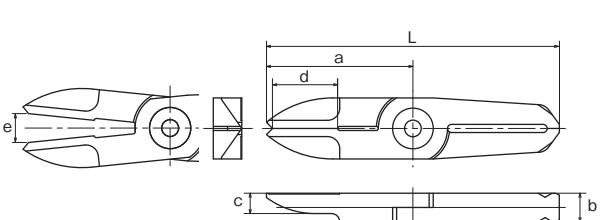

>> For guidance on cutting capability, see p. 29 of the technical material.

AJL

Straight long blades for plastic

AJL/This is a long type set of straight blades.
This is useful when there is distance between
the nippers and the gate cut portion of the workpiece.

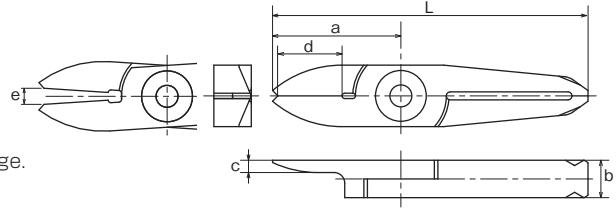

>> For guidance on cutting capability, see p. 29 of the technical material.

AJT

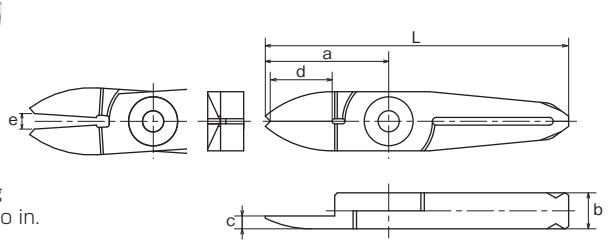

Thin, straight blades for plastic

AJT/This is a set of straight blades with a thin cutting edge.
It can cleanly finish cross sections without remnants.

>> For guidance on cutting capability, see p. 29 of the technical material.

Model No.	a	b	c	d:Effective Length	e:Blade opening	L	Weight (g)	Material	Applicable models

NT20AJB	40	12	6	20	9	97	120	Sintered Alloy	

AJY

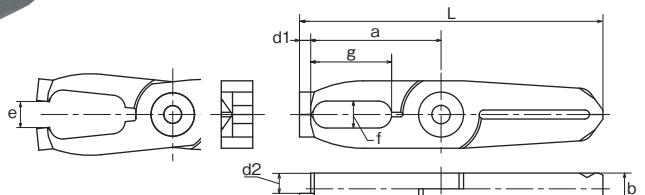

Plastic

Recessed, straight blades for plastic

AJY/This is effective when the width between the opposing gates is too short and the thickness of the blades will not go in.

Model No.	a	b	c	d:Effective Length(mm)	e:Blade opening	L	Weight(g)	Material	Applicable models
NT03AJY	24	7	2.5	11	3	59	19	Special alloy steel	GT-NT03 type

NT10AJY	35	9	4	17	7	72	82	Special alloy steel	GT-NT10 type

>> For guidance on cutting capability, see p. 29 of the technical material.

AD

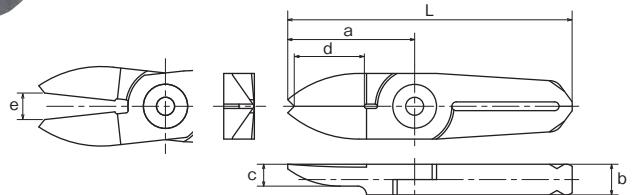

Plastic

Lift blades for plastic

AD/This is used for batch processing of the three-dimensional gate such as ride gate.

Model No.	a	b	f×g	Size(mm)	d1	d2	e:Blade opening	L	Weight(g)	Material	Applicable models
NT05AD	31.5	7	6×18		2.5	4.5	6	67.5	37	Special alloy steel	GT-NT05 type
NT10AD	39	9	8×21.5		4	5	7	86	65	Special alloy steel	GT-NT10 type
NT20AD	46	12	9×24.5		6	7	9	103	141	Special alloy steel	GT-NT20 type

>> For guidance on cutting capability, see p. 29 of the technical material.

AJV

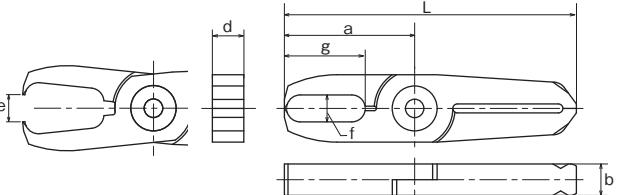

Plastic

V shaped straight blades for plastic

AJV/This is suitable for gate processing when the cross section is curved or the cut end must not be left.

Model No.	a	b	c	Size(mm)	d:Effective Length	e:Blade opening	L	Weight(g)	Material	Applicable models
NT05AJV	29	7	5		15	6	65	29	Special alloy steel	GT-NT05 type
NT10AJV	35	9	6		17	7	82	63	Special alloy steel	GT-NT10 type

>> For guidance on cutting capability, see p. 29 of the technical material.

AE

Plastic

Nipping blades for plastic

AE/Used for processing plastic gates such as ride gates and discard gates.

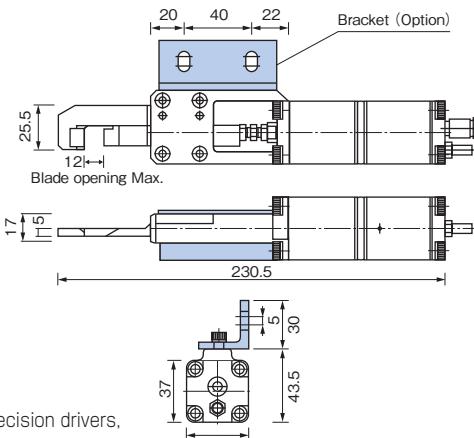

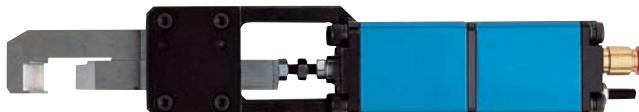

Model No.	a	b	f×g	Size(mm)	d:Effective Length	e:Blade opening	L	Weight(g)	Material	Applicable models
NT05AE	29	7	6×18		7	6	65	36	Special alloy steel	GT-NT05 type
NT10AE	35	9	8×21.5		9	7	82	75	Special alloy steel	GT-NT10 type

>> For guidance on cutting capability, see p. 29 of the technical material.

Blades are optional. Note that forward and backward-facing blades are available.

Thrust-Cut Air Nipper

VESSEL

GT-NK10

Thrust-Cut Air Nipper

- These nippers are equipped with a foot switch and are linked to high precision drivers, enabling the cutting of film-shaped gates from the thin end, preventing wrinkles around the cut.

Reference

Connectable unit numbers	4	3	1	1	6	4	2	1	2	1	2	1

These air nippers are connected to a heater to suppress cracks and whitening of clear materials such as acrylic. The gate is slowly melted as it's cut, resulting in a clean, unblemished cut surface.

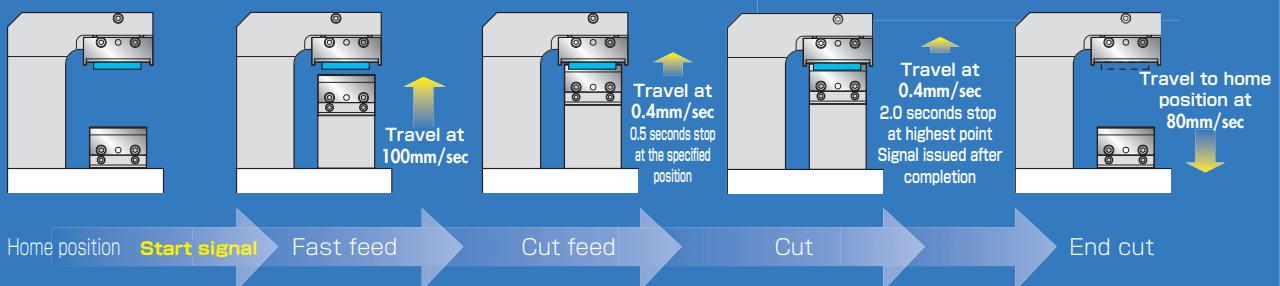

The blade is fed to the gate position speedily and is controlled to cut very slowly, making the cut surface clean and unblemished.

Various setting with this dedicated controller

(optionally available)

Practical example of gate-cut

Heat Air Nippers

VESSEL

- Requires separately sold Hydro Controller.
- Custom-made blade lengths and cylinder capacities available.

- Included heater
- Included temperature sensor
- Air Pressure: 0.6MPa • Working air hose inner diameter: 4mm
※200V/240V heaters are also available to order.

NKH20A/20AR Air-hydro nippers(thrust cut type)

- Air-hydro cylinders produce high power from air and oil.
- These units are ideal for high precision cuts required for products such as optical resin lenses.

Model No.	Cutting Capacity width × thickness (mm) Acril	Blade Edge Temp. (MAX °C)	Cutting Cycle (sec/cut)	Air Consumption (cm³/str.)	Piston Stroke (mm)	Weight (g)

For the options noted above, contact us because required items or the numbers of them may change depending on the installation method, use details, etc. of servo heat nippers.

03

Air Nippers For Cutting and Crimping

GT-NS/NR

A tough body for hard jobs.

The parts machined at high precision enable smooth cutting jobs to be accomplished.

Various models are available;

Square type for automation cutting equipment;

Round type, together with a dedicated stand,
for resin or direct gate-cutting.;

Lever type for manual operation...

NM Blades

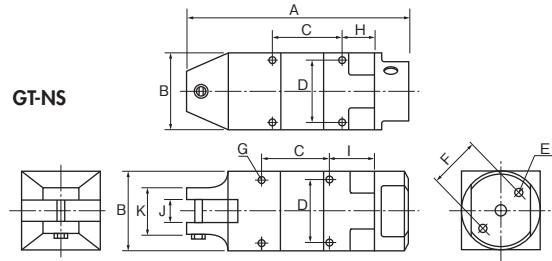

Springless NM blades, innovative for the around-the-clock operation which opens the blades by magnet repulsion, and which eliminates troubles of defective gate-cutting.

Air Nippers For Cutting and Crimping

VESSEL

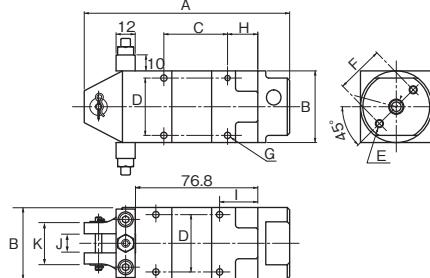

- The position of air intake port is 180-degree rotatable.
- Two air intake ports are provided, so they can be switched depending on the mounting place.

Made-to-order

GT-NS20H-1 (Blade opening adjustable)

GT-NS2/3/5/7/10L/20/30

Square Air Nippers

● VESSEL provides a generous selection of blades for all wire cutting needs, including resin product gate cuts and automatic welding equipment.

Comes with sprue
chuck function②

L blades
for sprue cut

Nipping blades
for sprue cut

A large R is provided in the cross section for gate processing where the cut end must not be left. An angled blades can be selected in accordance with the installation angle of the main unit.

Used for processing plastic gates such as ride gates, discard gates. The cutting edge is angled so that the main unit can set up diagonally.

Mainly in gate processing for direct gates, the sprue is caught with urethane rubber. A large R is provided in the cross section for gate processing where the cut end must not be left.

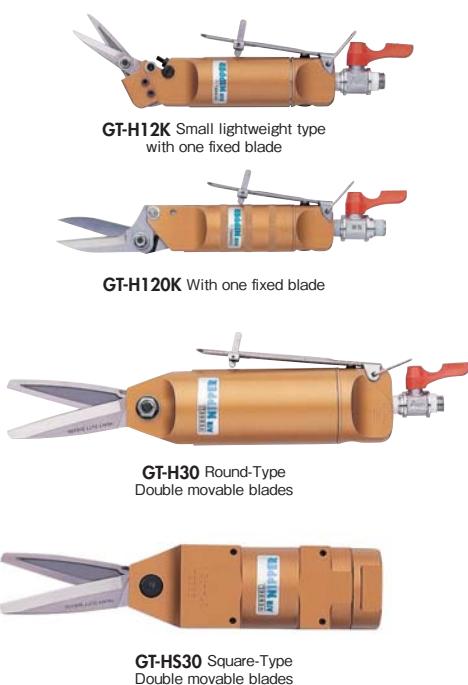

Mainly in gate processing for direct gates, the sprue is caught with urethane rubber. A large R is provided in the cross section for gate processing where the cut end must not be left.

This is an angled long type straight set of blades with a 90-degree angle. Ideal for direct gate cut.

This is the perfect spherical set of cutting blades for sprue cut. The blades can be inserted precisely in narrow areas that have ribs around them and the finish is very clean.

For quasi-standard products, contact a relevant branch office or sales distributor.

Air Scissors
